

Our Certifications

Our data erasure solutions have been tested, certified, and approved to ensure compliance with the most rigorous regulatory standards.

Global Software Certifications

Certified for Common Criteria (ISO 15408)

Common Criteria is an internationally recognized independent security certification recognized by governments in 31 countries across Europe, Australasia, Asia and North America.

ANSSI

Blanco Drive Eraser is certified by **ANSSI** (French National Cybersecurity Agency) as fully compliant with all certification requirements and is the only data erasure software provider to be certified at this level. The ANSSI evaluation encompasses erasure of both HDDs and SSDs.

TÜV Saarland

TÜV Saarland officially endorsed Blanco's erasure product based on the positive results found. TÜV Saarland found that Blanco's software provides a reliable and effective mechanism to erase private data from mobile devices, removable media, LUNs, drives, as well as erases files and folders.

STQC (Standardization Testing & Quality Certification)

Blanco Drive Eraser is now certified by **STQC** based on successful secure, functional test runs, and is the first Blanco product to receive approval and certification by the Indian government.

TTA – Telecommunications Technology Association

Blanco Drive Eraser 7.3.1 received Korea's highest level of **GS Certification of Software Quality** from the **Telecommunications Technology Association (TTA)** after undergoing a comprehensive evaluation for functional suitability, performance efficiency, usability, reliability, and security based on ISO standards.

NYCE

Blanco's data erasure software is approved and certified in accordance with **NYCE** Mexican standards for development. As a result, Blanco's methods of erasure have been evaluated and deemed to be in compliance with the criteria established by the INAI Guide to secure data deletion.

The Polish Internal Security Agency

The **ABW**, revered as the Polish special service, is responsible for protection of the country's internal security and its constitutional order. Blanco is the only data erasure software certified by Polish authorities.

The National Cryptologic Centre (CCN)

CCN operates within the National Intelligence Centre (CNI) in Spain, and is responsible for ensuring the security of information systems and handling cybersecurity threats for public administrations and strategic companies. It has certified Blanco File Eraser and praised for delivering secure, automated erasure and simple installation.

Försvarmakten

Blanco Drive Eraser is certified by the Swedish Armed Forces (Försvarmakten), providing our Scandinavian and Nordic customers with an absolute line of defense against security breaches.

Asset Disposal & Information Security Alliance (ADISA)

The **ADISA** Research Centre is the test laboratory operated by ADISA Certification Limited where software overwriting products can have claims made about their effectiveness verified. **Blanco's SSD Erasure Method** passed tests against ADISA Test Level I (attack using standard COTS forensic tools and techniques) and Test Level II (attack using standard intrusive/destructive testing tools designed to read data directly off of a chip) testing.

Blanco Drive Eraser 7.7.1 is certified to the newly launched IEEE 2883 Compliance, under the ADISA PA schema. **Blanco Driver Eraser** has passed the Product Assurance test for NIST 800-88 compliance, and is one of the few certified products with IEEE 2883 Standard on Data Sanitization in the market and achieved Assurance Level 5.

Blanco Eraser for Apple Devices v5.4.2 has passed the ADISA Product Claim Test (PCT) Level 1 test certification, the first certification for this product and the only certification for embedded storage media (media tested: Apple Macbook Pro M2 – macOS Sonoma 14.7 / algorithm used: Apple iOS Erasure)

Additionally, **Blanco Mobile Diagnostics & Erasure** has been certified to sanitize data on mobile devices against ADISA Test Level I, and **Blanco Driver Eraser** has been certified to sanitize data against ADISA Test Level II.

Blanco WinEraser has been certified under ADISA Test Level 2 for its ability to render data irretrievable on SSD and NVMe media, and has achieved Assurance Level 4.

Global Software Approvals & Recommendations

North Atlantic Treaty Organization (NATO)

Blanco's data erasure products are recommended by **NATO** and included in the prestigious **NATO Information Assurance Product Catalogue** (NIAPC). Blanco worked closely with NATO to achieve this recommendation and inclusion in NIAPC, which is provided to NATO military partners and Partnership for Peace program members.

General Intelligence and Security Service

The **Dutch National Signals Security Bureau (NBV)**, part of the General Intelligence and Security Service of the Netherlands that promotes the protection of government information, has approved **Blanco Drive Eraser** for erasing HDDs and SSDs.

Norwegian National Security Authority (NSM)

The **Norwegian National Security Authority (NSM)** is a cross-sectoral professional and supervisory authority within the protective security services in Norway. **Blanco Drive Eraser v7.1.0** is NSM-approved.

Global Software Approvals & Recommendations

Ontrack

Ontrack, the global experts in data recovery, have officially recommended and endorsed Blanco Drive Eraser 6 as the best way to successfully erase data from HDDs and SSDs in servers, laptops and more.

Company-wide Recognitions

ISO9001

ISO27001

HIPPA Compliant
